The fairer and more delicate the skin, the more likely it is to freckle, and the worse it will look after it is freckled.

Thousands of women, otherwise beautiful, are disfigured by these unsightly, brown blotches. Nothing will hide them. They are a source of misery, but they can be cured.

La Freckla is the death-warrant to freckles. The preparation of La Freckla is one of Mme. Yale's greatest achievements. There are many imitations, some of them very dangerous and harmful to the skin, none of them really effective. For safety and certainty, insist always on getting the genuine and original La Freckla.
